APPENDICES.

INTRODUCTION

This Volume on the Non-Agricultural Labour Force is one of the three being published for Pakistan, East Pakistan and West Pakistan. Data in these Volumes give the detailed classification of the Non-Agricultural Labour Force by Occupation and Industry as collected in the Census of Population conducted in the month of January 1961. Details have also been provided for employment status, economic status, and educational levels as well as age, sex and religion. The data is for the Non-Agricultural Labour Force aged 10 years and over. For the sake of comparison with the 1951 Census data, some information has also been provided for the Labour Force aged 12 years and over.

The Non-Agricultural Labour Force is only a part of the total Civilian Labour Force, the details of which have been provided in the 1961 Census Reports, Volumes 1, 2 and 3. These Volumes also contain some details about the Agricultural Labour Force and its characteristics. Data on other self-supporting persons as well as dependants have also been included there.

The information contained herein was collected at the time of the 1961 Census of Population on the Pakistan Standard Individual Schedule. The initial classification and tabulation was undertaken at 17 Hand Sorting Centres, 8 in East Pakistan and 9 in West Pakistan, and two Compilation Centres, one each at Dacca and Lahore. The hand sorted data, as referred to above has already been printed in Volumes 1, 2 and 3. The Census Schedules of the Non-Agricultural Labour Force were separated and sent to the Machine Sorting Centres, Dacca and Karachi, for East and West Pakistan, respectively. The data contained in this Volume was machine-sorted except for Table 1 which originally appeared in 1961 Census Bulletin No. 5, Economic Characteristics, as well as in Table 41 in Volumes 1, 2 and 3. Details regarding the classification, etc., are given in the Explanatory Notes preceding the tables.

Preliminary planning for the Census was started under the supervision of Mr. M. H. Sufi, C.S.P., Census Commissioner. He was succeeded by Mr. R. D. Howe, M.B.E., S.Q.A., C.S.P., who was responsible for the finalization of the plans as well as the actual conduct of the Census. On his retirement from service, he was succeeded by Mr. A. Rashid, C.S.P., who had till then been the Provincial Director of Census for East Pakistan. Mr. Rashid had also had the experience of the last Census and he laid down the final policy for sorting and tabulation as well as for the layout of the various Census Reports.

After the departure of Mr. A. Rashid the post of the Census Commissioner was abolished and the Census Organization was placed directly under Mr. A. O. Raziur-Rehman, C.S.P., Deputy Secretary, and later on under Mr. A. K. M. Abdus Sattar, Deputy Secretary, Home Affairs Division. Most of the Census Publications have been issued under their guidance.

Mr. E. H. Slade, who was the Census Commissioner in 1951 was especially requested to serve as Census Advisor for the 1961 Census. With his knowledge and background of the Pakistani conditions, he proved to be of great help in the planning of the compilation and tabulation processes. He had left when I joined the Census Organisation. His successor, Mr. Lowell Trueman Galt, comes from the U.S. Bureau of the Census and had been provided as the Principal Statistical Advisor to the Government of Pakistan by the U.S. Agency for International Development. I am personally indebted to him for constant guidance and encouragement especially after the departure of Mr. A. Rashid, C.S.P., as the Census Commissioner.

Mr. N. Shamsi, Deputy Census Commissioner, who continued in the Census Organisation upto August 1962, when he was replaced by myself, ably assisted the Census Commissioners in the planning and execution of the various operations involved in this huge undertaking of the "Big Count". He was largely responsible for the layout of original tables which were but slightly modified by me later on.

Mr. Ghulam Mustafa, Statistical Officer, who had been connected with the last Census proved to be of much use at all stages of planning and execution including the set up of the Machine Sorting Centres in which these data were tabulated. In fact, he has been the only continuing link left in the Census Organisation and I am pleased to record my appreciation for the whole-hearted and ungrudging assistance he has provided to me and his other colleagues. The "Explanatory Notes" appearing in this Volume have also been provided by him.

The data contained in this Volume have been machine sorted on 40-column I.C.T., equipment. Any large-scale machine operation calls forth a combination of technical skill and administrative abilities not easily obtainable. We were fortunate to have such a combination in Mr. W. A. Abbasi, Assistant Director of Census, Machine Sorting Centre, Karachi, who was mainly responsible for planning the Sorting and Compilation instructions as well as execution of the job for West Pakistan. After his departure on training abroad in September 1963, Mr. A. G. Khan, Superintendent, Census Administration, took part-time charge of the Centre. The remaining job for the sorting and compilation was completed under his administrative control.

Mr. Ruhul Amin Molla, Deputy Director of Census, looked after the operations as incharge of the Machine Sorting Centre, Dacca. Although he was basically an administrator, he proved himself capable of handling technical problems of the Centre. It is through his hard work and zeal that we were able to complete our assignment in East Pakistan inspite of the heavy rains and high humidity which caused a large percentage of the cards to become unserviceable.

It is also appropriate to acknowledge the services of those who were responsible for actually doing the job. All operators, compilers and typists at the Machine Sorting Centres at Dacca and Karachi worked very hard with a sense of pride in their work. Although they were aware of the short tenure of their posts, we had very few desertions. Almost everyone worked with the full consideration for the need for accuracy. M/S Israr Husain and Abdus Sattar, Chief Compilers, at Karachi and Dacca respectively, proved to be in complete control of the operations and discharged their duties extremely well.

Checking of all the tables was done mostly under the supervision of Mr. Abdul Kader Faquir, Statistical Officer and Mr. S. Israr Husain, Chief Compiler. They also undertook the preparations of all-Pakistan tables and the printing of the Pakistan Volume.

Preparation of the manuscript of the East Pakistan Volume was undertaken by Mr. Riazuddin Ahmad, Statistical Officer, Dacca, while Mr. Haq Nawaz Sheikh, Statistical

Officer, Lahore, looked after the work for the West Pakistan Volume. Inspite of the shortage of staff in the last stages, they have ably handled their assignments.

Our thanks are due to the presses concerned for their co-operation and understanding. These Volumes are ample proof of their skill. We are also indebted to Mr. N. H. Khandker, Controller of Stationery and Printing, his deputies, M/s. Qasim Ali and Hamid Hasan, at Karachi and Dacca, and M/S Anwarul-Huq and Rajab Ali, Assistant Controllers, Karachi and Dacca, who provided us constant assistance and guidance at various stages of printing.

A Census operation utilizes services of hundreds of thousands of persons who put in their hard work as enumerators, compilers, supervisors, etc. Our thanks are due to these workers spread in every nook and corner of Pakistan without whose co-operation this gigantic operation would not have been successful.

Karachi,
June 30, 1964.

MOHAMMAD HAFIZ SHEIKH
M.A. (Panjab), M.Sc. (Texas A.M.C.),
Officer on Special Duty (Census),
Ministry of Home and Kashmir Affairs,
Home Affairs Division,
Government of Pakistan

EXPLANATORY NOTES

1. CONCEPTS, DEFINITIONS AND REFERENCE PERIOD

In the 1961 Census of Pakistan, as in 1951, the working members of the population have been classified according to the three concepts of "Occupation","Industry" and "Work Status". The "Occupation" of any person is the kind of work he performed. The nature of the business or service in which the work is done is classified separately as "Industry". A clerk, for example, may be employed in a Government Office, a mercantile office, a bank, a retail shop, or in any of the several sectors of the country's economy, but his occupation is still that of a clerk. Industries have also been classified into groups, sub-groups and minor groups. "Status" of a person denotes his relationship to other workers in the same organization according to whether he is an employer, one of the employees, or working alone on his own account. A further status classification known as "Unpaid Family Help" is used to describe persons who contribute their work in the family farm or business enterprise without receiving Independent remuneration in cash or kind.

The basic concept of classification of all persons enumerated as "economically active" or "inactive" was the same in both the 1961 and 1951 censuses. A significant difference, however, must be noted in application of the concept. In 1951 all persons reported as aged "under 12 years" were considered as "dependants" and therefore, by definition, eliminated from the labour force. Subsequent analysis of the census tabulations indicated some heaping in the age group 10-11 at the expense of the next higher age group 12-14. It was also apprehended that a lower limit of 12 years might not give a realistic reflection of labour force in a country with low median age and requirement for early Productivity particularly as regards work on the family farm or business. Although decision was taken to enlarge the age span of economically active population. for the sake of international comparison and comparison with the 1951 Census separate detail has, again been presented for persons 12 years of age and over in Tables.

A qualitative improvement in sharpening the concepts was introduced in phrasing the enquiry in this census. Whereas in 1951 all persons 12 years and over were asked, "Are you usually self supporting or partly self-supporting or are you seeking work", in 1961 the questions identifying economically active persons were more direct and to the point, "Are you working for profit or to earn wages or salary or do you help any member of your family on the farm, etc.? "This was surely a gain in clarity for understanding both by the respondent and the enumerator.

Another significant difference was shortening the reference period for report of occupation of status from "month of January" as used in the 1951 Census to "last week", i.e. the week preceding the enumerators visit. This applied only to non-agricultural workers.

2 COLLECTION OF DATA

The data regarding economic activity were collected from all persons aged 10 years and over. Information was obtained in response to questions No. 15 to 21 of the standard Pakistan Individual Schedule. (Reproduced at Appendix A).

> "*Question No.* 15—*Are you working for profit or to earn wages or salary or do you help any member of your family on the farm etc.*?"

Three alternate answers had been provided on the schedule and enumerators were required to put a circle round the number 1, 2 or 3.

(For East Pakistan the schedule had a fourth box designated "Housewives". This was provided to meet the strong objection of female groups against being termed as "inactive." It was not, however, considered necessary to make the relevant changes in case of West Pakistan).

If the answer to the above question was "Yes" then enumerators were required to put a circle round (1), under "working". Persons who were helping any member of their family in his trade or profession even if they were not paid in cash or kind for such work were classified as " working."

If the answer to the above question was "No" enumerators were required to ask further whether the person was "looking for work", or not. In case the respondent was looking for work, the circle was put around (2). In case the respondent answered "No", then he was not looking for work, and the circle was to be put around (3), which denoted "inactive" in terms of the labour force concept.

No specific period of reference was provided for agricultural workers but for non-agricultural workers a question regarding "working" or "not working but looking for work" was put with specific reference to "during the last week" *i.e.*, the week prior to enumeration of the household.

Students and housewives engaged in household duties only were treated as " inactives." This group also included persons not working and those living on rent or pension only. Beggars and prostitutes were also classed as "inactives". For the "inactive" group questions 16 to 20 were omitted and details regarding them were recorded under question No. 21.

Question No. 16 to 20 were asked of those persons who were "either working" or "looking for work."

> *Question No.* 16—"*What is your main occupation*? *or* "*What kind of work do you do*?

In answer to this question the enumerators were required to circle round the letter "T" if the respondent was a "tiller" of the soil, otherwise the name of the occupation was required to be written in the space provided. A "tiller" of the soil was defined as the person who himself works on the land or gets it cultivated under his direct personal supervision.

For any other occupation, the enumerator had been specifically instructed to record it in such a way that it would provide an adequate description of the work that the person concerned was doing or, if not working, was looking for work. In case the person was looking for work for the first time "None Yet" was required to be entered. The enumerators were provided a short list of occupations giving indication of the precision required. Appropriate description of work was required to be entered irrespective of educational, professional or technical qualifications achieved by a person. Use of vague, incomplete and ambiguous descriptions such as "service", "labourer", "salesman", "factory workers", etc., were specifically discouraged. The Enumerators Booklet listed twelve such generic titles which would not be acceptable and indicated what detail should be given to make each one explicit.

Question No. 17 was put to those persons for whom "T" in question 16 was not circled *i.e.*, for all persons who did not claim to be tillers of the soil. For these persons the appropriate name and type of industry, business or service was to be entered. The entry was to be made only if the person was working or, if not working, had previously worked or was presently looking for work. In the case of persons looking for work the first time, "X" was required to be recorded against the question. The word "Industry" in this question referred to the activity of the firm, establishment or department in which the person was employed or to the kind of business the person operated.

Question No. 18 was asked of those persons only who claimed to be tillers of the soil and thus "T" in question 16 had been circled. There were four parts of this question.

(1) *Do you own all or part of the land you till*?

(2) *Do you pay rent in cash or kind for all or part of the land you till*? (*In East Pakistan*: *Are you a share cropper?*

(3) *Are you unpaid family help*?

(4) *Are you an agricultural labourer working for others for wages in cash or kind*?

The enumerators were required to put a circle round 1, 2, 3 or 4 if the answer was "Yes" to any of these questions. A person could have more than one number circled if, for example he owned some land, had some more land on rent, and also worked as paid labourer in his spare time. In East Pakistan another box No. 3 was provided for "share-cropper", after box No : 2 and the subsequet boxes were numbered as 4 and 5.

Question No. 19 was put to persons for whom "T" in question 16 had not been circled and concerned the status of the enumerated person in business, trade, industry or service. This question had four parts :

(*i*) *In your main occupation do you employ others*? The enumerators were required to circle "Employer" if the answer was " Yes."

Or

(*ii*) *Are you an employee*? In case "Yes" a circle was required to be put round "Employee".

Or

(*iii*) *Are you an independent worker*? In case "Yes", the circle was required to be put round "Independent worker".

Or

(*iv*) *Are you an unpaid family help*? In case "Yes", the word "Unpaid family help" was required to be circled.

Every non-agriculturist who was economically active was classified under one of the above categories. It was made clear that a person was not to be classified as "Employer" merely because he employed domestic servants although those servants themselves were to be classified as "Employees". Similarly manager of a firm, was not to be called an employer even though he could hire and fire personnel for the firm since the manager himself was an "Employee" of the firm. "Independent Workers" were all those persons who worked independently without employing anybody and without working for anyone for wages or salaries. A member of the family who assisted directly in the trade or business of another member but received no separate payment in cash or kind was classified as " Unpaid family help."

Question No. 20 was concerned with the subsdiary means of livelihood of the enumerated person. If the person did not have a subsidiary livelihood, "X" was required to be put against the question. In case of a subsidiary occupation, the name of the occupation was required to be entered in full and in sufficient detail to distinguish it from Main Occupations as already recorded in Question 16.

Obviously a person would have a subsidiary occupation only if a Main Occupation had been given earlier. A subsidiary means of livelihood could either be a secondary source of income pursued throughout whole year or an alternative occupation adopted at times when the main occupation could not be followed.

In rural areas, the subsidiary occupation (if any) of the cultivator could be one of such agricultural occupations as poultry raising, bee keeping, etc., or a cottage industry, service on roads, or in militia, etc. Cottage industries, were required to be recorded as "Home pottery making" "Home mat making", etc., so as to distinguish from similar regular occupations.

Question No. 21 was asked to get details regarding "inactives", *i.e.*, only from those for whom circle had been put around "3" in question No. 15. There were four parts of his question as below and the enumerators were required to circle the appropriate number :

(1) House-wife performing household duties only. (In West Pakistan only, In East Pakistan this information was obtained under question 15).

(2) Rent receivers, pensioners, etc.

(3) Inmates of Prisons, asylums, etc., or beggars.

(4) Dependents and others.

More than one of the numbers in this question could be circled, but a multiple classification of the same person under more than one category was not attempted at the sorting stage.

3. METHOD OF CLASSIFICATION

3. (a) General

Although the scope of this Volume is the presentation of the detailed data regarding Non-Agricultural Labour Force, yet the nethod of classification of the population into broad categories of Economic Status and the detailed classification of Agricultural Labour Force, which, in Pakistan, Constitutes the major segment of the Labour Force is also explained here with a view to give a detailed idea of the data that are presented in Volumes 1, 2 and 3.

The data were first classified manually in the Hand Sorting Centres and then compiled at the Compilation Offices at Lahore and Dacca. The procedure for sorting was undertaken on the following broad lines :

(*i*) Persons under 10 years were classed as dependents and hence were not included in these sorts.

(*ii*) The three categories returned under question 15 viz : (*a*) "Working" (*b*) "Not working but looking for work" (*c*) "Neither working nor looking for work "were then classified separating at the same time those "working" as "tillers" and "non-tillers" as returned under question No. 16. Women doing household work were separated in East Pakistan on the basis of answers to question 15 and those in West Pakistan on the basis of answer to question 20. Other persons reported as neither working nor looking for work were classified as:

(*a*) Women doing household work (as above).

(*b*) Pensioners and Rent receivers.

(*c*) Inmates of Prisons and asylums etc.

(*d*) Dependents.

(*iii*) Those persons in the civilian labour force reported as "working" or "looking for work" as non-cultivators were either classified as agricultural or non-agricultural on the basis of answer to question No. 16 on occupation.

Following occupations were also classed as agricultural :

(*a*) Orchard and Nursery workers.

(*b*) Malis.

(*c*) Market Gardeners.

(*d*) Tea-Garden Labourers.

(*e*) Dairy Farmers and Poultry keepers.

(*f*) Herdsmen and Animal Breeders.

(*g*) Bee Keepers.

(*h*) Silk Worm Keepers.

(*i*) Other Breeders.

(*j*) Drivers of Farm Tractors and Machines.

(*k*) Hunters and Trappers.

For the above three sorts the following age gr oups were maintained :

10—11 Years.
12—14 Years.
15—19 Years.
20—24 Years.
25—34 Years.
35—44 Years.
45—54 Years.
55—59 Years.
60 Years and over.

(*iv*) Cultivators or tillers of the soil were then classified according to eight status of land tenure categories providing for possible cases of tiller having more than one land tenure status. At the same time they were classified in the age groups of 10 years and over and 12 years and over. Their details are given in tables 50 and 51 of Volume 1, 2 and 3. A further cross classification provided for the marital status groups and educational levels of the cultivators. But these latter two cross classifications were not tabulated.

(*v*) The non-cultivating Agriculturists separated as per (*iii*) above were classified according to occupations listed thereunder. Their details are given in tables 46 and 47 in Volume 1, 2 and 3. They were cross-classified by Marital Status, Educational level and Employment Status as Employers, Employees, independent workers and Unpaid family help. These sorts were also not tabulated.

(*vi*) A further sort of all persons of the Agricultural Labour Force was made with a view to classifying them according to subsidiary occupations persued and their details appear in table 48 in Volumes 1, 2 and 3.

Tables 41 to 51 in Volumes 1, 2 and 3 are the compilations from the above mentioned hand sorts omitting the cross-classification by age as subsequent machine sorted results revealed that the cross-classification by age was not done accurately at the hand sorting stage.

Schedules of persons classified as Non-Agricultural Civilian Labour Force were transferred to the Machine Sorting Centres for detailed classification of Occupation and Industries including Business or Service Groups and their details for West Pakistan is given in this Volume.

3(b) Machine Sorting :

The data regarding the Non-Agricultural Labour Force were punched and classified on 40 column I.C.T. punched card equipment installed at Karachi and Dacca. The data for West Pakistan were tabulated at Karachi and for East Pakistan, at the Machine Sorting Centre, Dacca. The Karachi Centre was under the charge of an Assistant Director who worked under the Deputy Census Commissioner and later under the Officer on Special Duty (Census). The Dacca Centre which was headed by a Deputy Director, worked under the supervision of the Director of Census, East Pakistan. Only punches-verifiers, gang summary punches (reproducers) and counter-sorters were used. The data classified under various groups by the counter-sorters was further tabulated with the help of desk calculating machines.

The design of the card used for the Non-Agricultural Labour Force is given at Appendix B. Besides the location code which was punched to the level of the Census circles,* two more detailed code lists were prescribed. One was the "Classification Code of Occupations," and other was the "Classification Code of Industries". Apart from these, other information namely, age, sex, marital status and educational level were also coded according to simple code lists, age being coded in actual number of completed years. The coding was performed by a team of coders who were especially trained. The codes were marked on the schedule itself which was then passed on to the punch operator. The gang summary punch (reproducer) was used for punching information common to several cards, such as the location code of Census circles. The punched cards were than cent per cent verified (incorrect cards being repunched), and were next passed to the counter-sorters which could, at one pass, classify the information into a maximum of 12 groups, each of which was then reclassified into sub-groups and minor groups. The readings taken from the counter-sorters were recorded on "Machine Sorter's Tickets." The Machine Sorter's Tickets were passed on to the Compilation Section for posting on the compilation sheets. The data thus posted were then summarized by desk type adding machines and then posted on the prescribed tabular proformas. In all, 10 tables were prepared for the Non-Agricultural Labour Force.

3(c) Classification Code of Occupations

In the 1951 Census a four digit classification code was prepared in consultation with representatives of the interested Ministries and Departments who were the members of the Census Commissioner's Advisory Committee. For the 1961 Census, the said classification code was carefully re-examined and, after considerable modification, was redrawn into a three digit code mainly on the pattern of the Malayan and Canadian Classification codes and, in general, following the I.L.O.

---

*1. For the purposes of Census, the administrative districts were divided into Census districts, Census charges, Census circles, and blocks. A block normally comprised a maximum population up to seven hundred and fifty persons.

classification; as adopted to suit the country's special requirements. The code is reproduced at Appendix (C). All the occupations are classified into the following main groups :

1. *Professional, Technical and Related Occupations.*
2. *Managerial, Administrative, Clerical and Related Workers.*
3. *Sales and Related Occupations.*
4. *Agriculture, Fishing, Trapping and Logging Occupations.*
5. *Mine, Quarry and Related Occupations.*
6. *Transport and Communication Occupations.*

7/8. *Manufacturing and Mechanical Occupations.*

9. *Construction occupations, General Labourers.*
10. *Service, Sport, Entertainment & Recreation Occupations.*

The main groups denoted by the first digit were divided into sub-groups, denoted by the second digit on decimal classification system. The sub-groups were similarly further divided into minor groups of occupations on the same system. The nine main groups were thus divided into 76 sub-groups and 349 minor groups. A brief dicussion of the classification code, with special reference to the corresponding 1951 scheme, is given here with the view to bringing out the salient features and the changes which affect comparability in parallel tables from the two.

(i) Main group 1 : Technical, Professional an d Related Occupations.

This group comprises persons practising skilled professions or techniques usually requiring specialised knowledge and training and often requiring the possession of the University degrees, diplomas or certificates. One deviation from the 1951 classification scheme is the exclusion of Deck Officers, Engineering Officers, Pilots and Flight Engineers of ships and Aircrafts from there groups and their inclusion under the main group 6 "Transport or Communication occupations". This deviation, while making the classification more accurate renders the 1961 data slightly non-comparable with the corresponding 1951 data, given in tables (11-A) of 1951 Volumes 1 to 6 and those in Volumes 7 to 8 giving detailed data on economic characteristics for West and East Pakistan respectively.

The inclusion of Musicians, Actors, and other skilled entertainers under this main group, although in conformity with the 1951 practice and the ILO classification does not conform with the general criteria noted above, because "musicians" cover a wide range of persons in Pakistan, a large number of whom cannot be considered as sufficiently skilled for inclusion under this group.

(ii) Main group 2 : Managerial, Administrative, Clerical and Related Worker.

This group is almost indentical with the corresponding 1951 main group even though the attempt to retain this comparability has resulted in the inclusion of Telegraph Operators, Telephone operators, Ticket Collectors and Inspectors, Postmen and Postal Sorter some (and particularly Ticket Collectors and Inspectors) of whom should have been more appropriately included under Transport and Communications Occupations.

(iii) Main group 3 : Sales and related Occupations.

This group is almost identical with the corresponding 1951 Group. The number of sub-groups is however 7 in the 1961 classification, while these were only 3 in 1951.

(iv) Main group 4 : Agriculture, Fishing, Trapping and Logging Occupations.

This group is also almost identical with the corresponding 1951 classification. For the purpose of presentation of data in the tables, persons engaged in Forestry and Fishing occupations were, treated as part of the Non-Agricultural Labour Force both in the 1951 and 1961 Censuses. Persons engaged in other agricultural occupations, viz: specialised cultivation (gardening etc.) animal husbandry and "other breeders" were treated as part of the Agricultural Labour Foree. The details of Agricultural Labour Force classified by occupations, as already stated, have been given in tables 46 and 47 of Volumes 1, 2 and 3. The totals for A.L.F. are given separately under one heading in tables 7 and 8. An examination of all these tables however shows that 37,215 persons in West Pakistan and 2,838 persons in East Pakistan belonging to the Agricultural Labour Force, as defined above, have been included under Non-Agricultural Labour Force and their schedules were sent in error by the Hand Sorting Centres to the respective Machine Sorting Centres. They were, therefore, classified as part of the Non-Agricultural Labour Force and presented accordingly in view of the fact that the main tables classifying the Civilian Labour Force in the principal categories, as published in Volumes 1, 2, and 3, include these persons in the total number of Non-Agricultural Labour Force. The data being presented in Volumes 4, 5 and 6 was still under compilation when Volumes 1, 2 and 3 were being published. Therefore, this obvious mistake could not be rectified in the main Volumes. However, the number affected is very small, that is 0.17 percent of the Agriculture Labour Force of Pakistan, 0.01 percent in East Pakistan and 0.49 percent in West Pakistan. When considered as part of Non-Agricultural Labour Force, their number is only 0.51 percent of the Non-Agricultural Labour Force of Pakistan, 0.11 percent in East Pakistan and 0.71 percent in West Pakistan. As such, this factor is not important enough to affect the over-all broad classification. They have, however, been classified as such under respective sub-groups under "Agricultural, Forestry and Fishing" and their figures can be read from the respective tables in this Volume. One more observation regarding the sub-group 40 headed "non-working land owners", appears necessary. This sub-group has been termed as such and included in the tables. But the land-owners who are not supervisory or operating cultivators and have no other economic occupations are treated as, "rent receivers" and hence classed as "economically inactive". Therefore, the number of persons included in the tables of Non-Agricultural Labour Force may be taken to be those of Supervising Cultivators, or Directors of Cultivation. Their total number included under the Non-Agricultural Labour Force (due to the mistake referred to above) is only 53 in West Pakistan and 34 in East Pakistan, which is quite insignificant.

(v) Main group 5 : Mine, Quarry and Related Occupations.

This group is also almost identical with the corresponding 1951 group except that the sub-group: "Oil well workers" also included the workers in "Natural Gas Occupations" which have been separately classified in the minor groups.

(vi) Main group 6 : Transport and Communication Occupations.

This group varies slightly from the corresponding 1951 group, in view of the observations made under the discussion regarding the main groups 1 and 2.

(vii) Main group 7/8 : Manufacturing and Mechanical Occupations.

This group is almost identitical with the corresponding 1951 main group number 7 except that the separation of, "Construction Occupations" under the new main group 9 has resulted in the exclusion of "Skilled Construction Occupations", from this group which have been shown in detail under the main group 9. Besides General labourers included in this group in 1951, are also included in the new group 9.

(viii) Main group 9 : Construction Occupations and General Labourers.

This has been classified as a separete main group, as explained above.

(ix) Main group 10 : Service Workers.

This group is also almost identical with the corresponding 1951 main group 8, except that for the purposes of classification "Members of the Armed Forces" were shown as sub-group 0—8 but their figures are not included in the Civilian Labour Force whose details have been given in Volumes 4, 5 and 6 Occupations "un-identifiable" or "not reported" have been included under this main group, whereas in the 1951 classification they constituted the main group 9.

3 (*d*) **Classification Code of Industries.**

At the time of 1951 Census, the Industrial sector of the country had not developed sufficiently to require a very detailed classification. Only a two digit code providing for nine main groups and 66 sub-groups was used. During the decade 1951-1961, this sector has taken rapid strides and together with service groups accounts for 25 per cent of the Civilian Labour Force of the country, 14 per cent in East Pakistan and 40 per cent in West Pakistan. After a careful examination of the classification codes of various countries, it was decided to adopt the Canadian Classification Code of Industries, with the exception of the main group "Agriculture" which was entirely re-cast and the addition of the following 5 minor groups in the Main groups 1, 6 and 9.

(*i*) Brine evaporation.

(*ii*) Coal gas manufacturing and distribution.

(*iii*) Natural gas distribution.

(*iv*) Post and Tele-communications.

(*v*) Other Central Government Departments.

The three digit code on decimal classification system providing for nine main groups. 40 sub-groups and 291 minor groups was thus prepared for the 1961 Census. (Reproduced at Appendix D). Almost all the main groups were defined in greater detail under sub-groups and minor groups, than in 1951. In the 1951 Census it was felt that the concept of "Industry Group" was not understood clearly either by the respondents or the enumerators. As such, the data on Industrial classification in certain detectable cases were found to be inconsistent with the corresponding occupational classification. In such cases the reported industrial entries were edited, but this was possible only for the main groups. The sub-group data were, therefore, not included in the 1951 Volume (No. 7) for West Pakistan. The minor group data for occupations were also dropped from the publication scheme for West Pakistan though published as such in Vol. 3 "East Pakistan" and Vol. 8. "Detailed tables of Economic Characteristics for East Pakistan". In West Pakistan Volume, corresponding to Vol. 6 of 1961, was not published for the 1951 Census.

Some salient points regarding the data will be discussed under para 5 tablewise explanatory notes. A brief description of the changes from 1951 scheme in the main groups and in their order is given below :

(*i*) Main group 0 : Agricultural Forestry and Fishing.

The classification divides the main group into 5 sub-groups and 18 minor groups. Of these, 2 sub-groups, namely "Forestry" and "Fishing and Trapping", have been treated as part of the Non-Agricultural Labour Force and are, therefore, of importance for the purposes of Volumes 4, 5 and 6. The sub-groups "Cultivation", "Live stock keeping", and "Other Agricultural classes" have (in so far as the workers in *agricultural occupations* are concerned), been classified manually and their data presented in Volumes. 1, 2 and 3. Their totals classified as "Agricultural Labour Force" are given in some of the tables in these Volumes. An insignificant proportion of the Agricultural Labour Force, as noted above, was included with the Non-Agricultural Labour Force and their details have been given in this Volume. Furthermore, a few workers having Non-Agricultural occupations, such as Accountants and Clerks, but who are clearly working in Agricultural Industry and, who, *ipso facto* constitute part of the Non-Agricultural Labour Force, have been classified in this main group.

(*ii*) Main group 1 : Mining, Quarrying and Mineral getting.

This group has been classified into 5 sub-groups and 23 minor groups, as against only 5 sub-groups of the 1951 classification scheme. One marked feature of the new classification is the separate indentification of "Prospecting" under a sub-group with three minor groups.

(*iii*) Main group 2-3: Manufacturing.

This corresponds to the main group (2-3) and 4 of the 1951 code, which was treated as comprising two main groups namely "Manufacturing and processing—mainly non-metal", and the main group "Manufacturing and processing—mainly minerals and metal". In 1951, while these two main groups were divided into 28 sub—groups, in the 1961 scheme this Main group has been classified into 16 sub-groups, and 136 minor groups.

(iv) Main group 4 : Construction.

This group corresponds to the main group 5 of the 1951 scheme. But it does not include Public utility facilities such as the provision of electricity, gas, steam, water and sanitation, which have been classed under a separate main group 6. Excluding these industries, the main group has been divided into 4 sub-groups or minor groups as against 2 in 1951.

(*v*) Main group 5 : Transportation, Storage and Communication.

This group completely corresponds to the main group 7 of the 1951 scheme, but is divided into 3 sub-groups and 15 minor groups as against only 7 sub-groups and no minor groups in the 1951 scheme.

(*vi*) Main group 6 : Public utility operation (except Transportation, Storage and Communication).

As stated above, this has been made a separate main group and classified into 5 minor group instead of 2 corresponding sub-groups in the 1951 scheme.

(*vii*) Main group 7 : Trade.

This group corresponds to the main group 6 "Commerce" in the 1951 scheme with the exclusion of the sub-groups "Banking Finance and Insurance", which constitute the Main group 8. It is divided into two sub-groups and 53 minor groups as against only two sub-groups (excluding Finance and Insurance) and no minor group in the 1951 scheme.

(*viii*) Main group 8 : Finance Insurance and Real Estate.

As stated above this was classed as a sub-group in 1951. In the new code it is divided into four minor groups with no sub-groups.

(*ix*) Main group 9: Service.

This group corresponds to the main groups 8 and 9 of the 1951 scheme and is divided into 6 sub-groups and 34 minor groups as against two main groups 14 sub-groups and no minor groups in the 1951 scheme. It also includes sub-group 99 "not working but looking for work" and or industries unclassified, which were included in main group 9 of the 1951 scheme.

4. DATA PRESENTED

The data given in this Volume are for the Civilian Labour Force only and also exclude 34,37,939 persons in the Agencies and the Special and Added areas of West Pakistan. The details of the enumerated segment of this excluded population are given in part VI of Volume 3 for West Pakistan. The corresponding 1951 data also excluded the population of the Frontier Regions. Due to transfer of certain areas with a population 1,27,328 from the special Areas to the districts of Hazara and Mardan, exclusion of Amb State (as reconstituted) from the district of Hazara and the inclusion of Gwadar in Mekran district, there is a small factor of non-comparability in the 1951 and 1961 data, as the labour force details for the smaller areas affected by transfers are not available. The details of these areas are given in the Explanatory Notes to the tables in part V of Volumes 3.

5. TABLE WISE EXPLANATORY NOTES.

Table 1 : Population by Economic Activity and sex 1961.

This table classifies the total population (excluding Non-Pakistanis and the pouplation of Frontier Region, as explained in para 4 above) into basic categories of economic status viz: (1) Civilian Labour Force 10 years and over, sub-divided into "working and not working, but looking for work" (2) persons not in the Civilian Labour Force aged 10 years and over, sub-divided into "women doing household work only" and "dependents and others aged 10 years and over" (including Defence Services and also economically inactive persons) and (3) Dependents below 10 years of age.

This preliminary classification of the total population, as explained in sub-para 3(a), was done at the Hand Sorting Centres. This summary tables has been published as Table No: 41 in Volumes 1, 2 and 3 and also as Table 1 in Bulletin No. 5. This is being reproduced in Volume 4 by provinces and in Volumes 5 and 6 by Districts, in order to make this classification of the total population in basic groups readily available in these Volumes, which mainly deal with the *detailed* classification of Non-Agricultural Civilian Labour Force. In Census Bulletin No. 5, this table (also numbered as Table 1 of that Bulletin) gives data by sub-divisions for East Pakistan and by Tehsils/Talukas for West Pakistan. A discussion of the data given in this table in comparison with the corresponding 1951 data and with those of other countries is contained in chapter 6 of the Volume I and Chapter 8 of Volumes 2 and 3.

Table 2 : Non-Agricultural Labour Force (10 years and over) by Occupation (Main and Sub-groups) Sex and Religion, 1961.

This table gives the data for the Non-Agricultural Labour Force *i.e.*, the number of those in the Civilian Force who were engaged in occupations *other than* Cultivation, Animal Husbandry, Dairy Farming, Poultry Keeping, Bee Keeping and Silk Worm Keeping etc., as described under para 3(a). The Non-Agricultural Labour Force however includes all workers in "Forestry" and "Fishery" industries. As stated under para 3(c) it also includes 40,053 persons in Pakistan (2,838 in East Pakistan and 37,215 in

West Pakistan) who, according to the definition, form part of the Agricultural Labour Force but were, by error in Hand Sorting, included with the Non-Agricultural Labour Force. The table gives the number of persons, by sex and for all religions and Muslims, engaged in occupations falling in each of the nine main groups and 76 sub-groups, as discussed in para 3 (c), with a few sub-groups combined together. Some important points regarding the classification scheme have also been discussed under the said para.

The number of unemployed persons, as included in the total against Non-Agricultural Labour Force, is also given separately in the last line "Not working but looking for work". They are, however, not included in the occupational groups. Their classification by occupational groups is given in Table 10. The table shows that 87.59 percent of the Non-Agricultural Labour Force in Pakistan is comprised of Muslims (96.57 percent in East Pakistan and 69.47 percent in West Pakistan). Of the total Non-Agricultural Labour Force 92.9 percent are Males and only 7.1 percent are Females in Pakistan. The corresponding percentages of females are 6.4 and 8.6 in East and West Pakistan.

In Volume 4, this table gives data for Pakistan with separate data for East Pakistan and West Pakistan. In Volumes 5 and 6 the table gives data for the respective provinces, Divisions and Districts with separate data for Cities. In the 1951 Census, occupational details cross-classified by religion were published only for East Pakistan (Table 11-A, Volume 3, Census of Pakistan 1951).

Table 3 : Non-Agricultural Labour Force (10 years and over) by Employment status, Age Groups and Sex—1961.

This table classifies the Non-Agricultural Labour Force aged 10 years and over, by sex, age and four categories of Employment status viz : Employers, Employees, Independent Workers (or Own Account Workers) and Unpaid Family Help. Employers are those who employ others on wages or salary in pursuceing their main occupation as reported for purposes of the Tables in this Volume. Employees are those who receive salary or wages in cash or kind for the work they do. Independent Workers are those who neither employ others nor are employed by anybody in their main occupation, but operate their trade or profession on their own. Unpaid family help are such members of the Civilian Labour Force who have been reported as working but who do not receive any remuneration in cash or kind for the work they do in a family undertaking or trade which is operated by some other member of the family (nuclear or extended). The table also cross-classifies the status classes by sex and by nine age groups. The age was reported in completed years as on 31st January, 1961. The distribution of the total Non-Agricultural Labour Force by age groups differs from that given in table 3 of Census Bulletin No. 5 (1961). The latter was derived from the last phase of the Hand Sorting operations and was found to be rather inaccurate. The Schedules for the Non-Agricultural Labour Force were handled through punched card machinery and, hence, the classification presented here gives a more accurate picture of the age distribution of the Non-Agricultural Labour Force, though this too, of course, is subject to inaccuracy of reporting of ages by the respondents.

In Volume 4 this table is presented for Pakistan, East and West Pakistan. In Volumes 5 and 6 this table gives separate data for Districts as also for cities.

Table 4 : Non-Agricultural Labour Force (10 years and over) by occupations (main and sub-groups) Employment Status, Age, Marital Status and Educational levels 1961.

This table presents the distribution of Non-Agricultural Labour Force by Sex (Both

Sexes and Males) and by occupational main groups and sub-groups, as given in table 2, cross-classified by the four employment status classes (leaving out those who were reported as "Not working but looking for work)", then by nine age groups, four marital status classes and five principal stages of educational attainments. The employment status classes have been explained in the preceding para regarding table 3. The four marital status classes are single (never married), married (reported as married at the time of Census), widowed (whose wife or husband had died and who had not remarried), and divorced (whose marriage had been dissolved according to religious, country or customary law and who had not remarried).

In the 1961 Census, the educational levels were recorded in great detail as presented in Volumes 1, 2 and 3. But for purposes of cross-classification with the occupational groups of the Non-Agricultural Labour Force the educational levels have been grouped in the following principal stages or attainments:-

(*i*) *Nil or below Primary:* Those who had not passed any educational grade or were reported as illiterate or had passed any of the grades 1, 2, 3 or 4 but had not passed grade 5.

(*ii*) *Primary* (*Passed*)*:* These who had passed any of the grades 5, 6 or 7 but had not passed grade 8.

(*iii*) *Middle* (*Passed*)*:* Those who had passed class 8 or 9 but not Matric.

(*iv*) *Matric* (*Passed*)*:* Those who had passed Matriculation examination or Secondary School examination as also those who have, in addition, passed the Intermediate examination.

(*v*) *Degree* (*Holders*)*:* Those who had University degree examination in Arts, Science or Technology, such as, B.A., B.Sc. including professional degrees such as B.Com., LL.B, M.B. B.S. (Medicine and Survery), B.E., (Engineering). This group also includes higher degree holders, that is, those who have obtained a Master's degree or Doctorate in Arts or Science, etc. It also includes Oriental degree holders, such as, Munshi Fazil, whose number has been given in brackets under respective number of degree holders.

The proportion of persons engaged in each of the occupational main groups in 1961 data compared with the corresponding 1951 distribution is given in statement No. 1.

The groups for 1951 figures have, as far as possible, been so taken as to be comparable with the 1961 scheme, yet a certain degree of non-comparability is inevitable in view of the observations regarding comparability of the 1961 and 1951 classification schemes made under para 3(*c*).

In Volume 4 this table gives data for Pakistan and Provinces and in Volumes 5 and 6 this table gives data by Districts and Cities.

STATEMENT NO. 1.

Occupational Distribution (Main Groups) of the Non-Agricultural Labour Force 1951 (12 Years & over) and 1961 (10 Years & over and 12 Years & over).

Occupation (Main groups)	Pakistan			East Pakistan			West Pakistan		
	1951	1961		1951	1961		1951	1961	
	12+	12+	10+	12+	12+	10+	12+	12+	10+
Non-Agricultural Labour Force ..	100	100	100	100	100	100	100	100	100
1. Professional, Technical & Related occupations.	4.06	5.38	5,33	5,57	7.45	7.35	3.08	4.37	4.33
2. Managerial, Administrative, Clerical & Related Workers.	9.34	8.78	8.69	9.58	7.99	7.88	9.18	9.17	9.10
3. Sales & Related occupations	18.72	16.83	16.77	23.13	20.64	20.54	15.83	14.95	14.91
4. Agricultural, [1]Fishing, Trapping & Logging occupations.	3.93	2.75	2.77	9.00	4.94	4.98	0.61	1.67	1.68
5. Mining, Quarrying & Related occupations.	0.15	0.23	0.23	0.04	0.03	0.03	0.22	0.33	0.33
6. Transport and Communication occupations.	3.49	5.70	5.67	5.34	5.76	5.70	2.27	5.67	5.65
7 & 8. Manufacturing and Mechanical occupations.	23.42	29.52	29.51	22.12	27.43	27.43	24.28	30.55	30.53
9. Construction occupations, General Labourers etc.	23.26	12.60	12.60	14.77	9.64	9.59	28.81	14.06	14.09
10. Service, Sport, Entertainment & Recreational occupations and others	13.59	14.99	15.15	10.41	13.82	14.11	15.67	15.57	15.66
Not working but looking for work.		3.16	3.24		2.26	2.34		3.61	3.68

---

1. This group includes mainly the percentage for forestry and fishing workers who are treated as part of Non-Agricultural labour Force and a few agriculturists (of para 3 (c)) included by mistake with the Non-Agricultural labour Force.

Table 5 : Non-Agriculture Labour Force (12 years & over) by occupations. Main and sub-groups, Sex, Industrial Status and Educational levels 1961.

This table gives the same distribution and cross-classification (excepting for cross-classification by marital status) for Non-Agricultural Labour Force aged 12 years and over as was given in table 4 for population aged 10 years and over. Its presentation in Volumes 4, 5 and 6 is also similar to that of table 4. As explained in para 1, separate tabulation for Non-Agricultural Labour Force aged 12 years and over has been given to facilitate comparison with the 1951 Census data and to cater to the needs of the Department of Manpower and Employment.

The corresponding 1951 table classifying the Non-Agricultural Labour Force in sub-groups cross-classified by Sex, Employment status, five age-groups and similar Educational levels is given as table 11-A of "Census of Pakistan 1951," Volumes 1, 2 and 4 to 6 and table 11-B of Volumes 3 (for Pakistan, former provinces of West Pakistan, and for East Pakistan) and in Vols. 7 and 8 by Districts.

Table 6 : Non-Agricultural Labour Force (10 years & over) by detailed occupations (main, sub and minor groups) and by Sex 1961.

This table gives the Non-Agricultural Labour Force by Sex, classified according to the minor occupational groups (as explained in para 3(c) grouped under the respective sub and main groups. In Volume 4, this table gives data for Pakistan and Provinces. In Volumes 5 and 6 this table gives data by District and for Cities. The corresponding 1951 table was not published for West Pakistan (Census of Pakistan 1951 Volume 7) as the detailed occupations were not found to have been correctly reported and classified. The table for East Pakistan was, however, published in the 1951, Volume 8.

Table 7: Civilian Labour Force (10 years & over) in each Industry (main and selected sub-groups) by occupations main groups) and by Sex 1961.

This table gives distribution of the Civilian Labour as "Agricultural" and "Non-Agricultural", and of the latter by main groups and certain important sub-groups of industrial classification as explained in para 3(d) and detailed at Appendix D. The distribution by Industries has been cross-classified by main occupational groups, as discussed under para 3(c). In the occupational main groups, however, eleven columns instead of nine have been provided by giving separate data for sub-groups 2.1 plus 2.3 "Administrative and Managerial and for the sub-group 2.3 "Clerical and related workers". Similarly two columns have been provided for the main group 9 "Construction workers and General labourers", one for "Construction, skilled," and the other for General labourers".

The figures against the line "Agricultural Labour Force" represent the total Labour Force so classified at the hand sorting stage. Details by occupations and different classes of land tenure status are given in Volumes 1, 2 and 3. All these persons have been shown in the occupational column, "Agricultural. Against the industry groups "Agriculture" and its sub-groups occurring under the third line "Non-Agricultural Labour Force", the figures are of the Non-Agricultural Labour Force engaged in the industry "Agriculture" and those of Forestry and Fishery workers. It has already been mentioned under para 3(c) and the above explanatory notes to table 2 that 2,838 persons in East Pakistan and 37,215 persons in West Pakistan belonging to the Agricultural Labour Force have, through a mistake of classification at the hand sorting stage, been included with the Non-Agricultural Labour Force. In this table these persons have been cross-classified against various Industry groups. Although it would seen that all such persons should have been given the Industry group Agriculture, but have been classified (under the occupational column Agriculture) *inter alia* against the Industry groups, Trade, Manufacturing and even Services. These figures could be visualised as those of such Agriculturists as gardners, Market gardners and other Agriculturists classes, who could as will be employed by persons or establishments pursuing a Non-Agricultural business, Industry or Service:

Persons reported as "Not working but looking for work" generally have no industry and, as such, are included in the total Civilian Labour Force and total Non-Agricultural Labour Force but not in the industry groups listed in the stub. Their total numbers in the last line are shown according to the occupational groups claimed by them.

In Volume 4 this table is presented for Pakistan, East Pakistan and West Pakistan, while in Volumes 5 and 6 this table gives data for every District and Cities. Table 13 of Census of Pakistan 1951, Volumes 1 to 6 (Volume 3 for East Pakistan) corresponds to this table.

Table 8 : Civilian Labour Force (10 years & over) by detailed Industries (Main-sub and minor groups and by Sex) 1961.

This table further classifies the distribution of Non-Agricultural Labour Force in almost all the sub and minor groups of the Industrial classification scheme, discussed under para 3(d) and given at Appendix D. The figures against "Civilian Labour Force" and "Agricultural Labour Force," are the same as given in table 7. This table in Volume 4 gives data for Pakistan, East and West Pakistan. In Volume 5 and 6 these data are given by Division, District and Cities.

The corresponding 1951 table, which classifies the Civilian Labour Force according to a short list of 66 sub-groups was printed only for East Pakistan, Volume 7—1951 and was not included in Vol. 8. West Pakistan, as the industries were not found to have been correctly reported and classified in detail.

Table 9: Non-Agricultural Labour Force (10 years & over) by Industry (main and sub-groups) Sex, Age, Educational levels and Employment status 1961.

This table gives the distribution of Non-Agricultural Civilian Labour Forces by sex according to the main and sub-groups of industrial classification scheme and cross-classifies the same by nine age-group, five standards of educational attainment and four classes, of Employment status. The age-groups are the same as used for a similar cross-classification of occupational distribution given under table 4. The educational levels and the employment status classes are the same as those given in table 4.

Statement 2 gives the percentage distribution of Civilian Labour Force by main industry groups for 1951 and 1961.

In Volume 4, this table gives data for Pakistan, East and West Pakistan, but in the provincial Volumes, 5 and 6, this table gives data by districts with separate data for cities.

STATEMENT No. 2

Percentage Industrial Distribution of Civilian Labour Force 1951 (12 Years & over) and 1961 (10 Years & over and 12 Years & Over).

Industry (main groups)	Pakistan			East Pakistan			West Pakistan		
	1951	1961		1951	1961		1951	1961

Note—In 1951 scheme the main group "Construction" included Public utility operation.

Table 10: Unemployed persons including first job seekers (aged 10 years and over), by occupations (main and sub-groups). Age, Educational levels, Marital status, Employment status and Sex 1961.

This table classifies the total number of persons reported as "Not working but looking for work" in the preceding tables, by occupations (main and sub-groups) reported by them. The table also gives four different cross-classifications *viz.*, by nine age-groups, by five educational levels, four marital status classes and five employment status classes, four as used for table 3 and the preceding table plus a fifth, employment status class of persons in whose cases the Employment status was not reported. A brief discussion regarding the probable reasons for the small total number of persons reported as, "Not working but looking for work", is given in para 6.7 of Volume 1 and the relevant paragraphs of chapter 8 of the provincial Volumes 2 and 3. In Volume No. 4, this table gives data for Pakistan, East and West Pakistan and in Vols. No. 5 & 6, this table gives data by districts with separate data for cities.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes form part of the Agricultural Labour Force, but the number of persons in each locality, have been classed as Non-Agriculturists Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality have been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of persons in each locality has been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality have been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality has been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality have been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality has been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality have been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality has been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality has been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality has been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but the number of Persons in each locality have been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting, are given on facing page.

*Non-working land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 37215 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economicplly inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 166 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 639 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1400 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

ABLE 4 – NON-AGRICULTURAL LABOUR FORCE (10 YEARS AND OVER) BY OCCUPATION (MAIN AND SUB-GROUPS), EMPLOYMENT STATUS, AGE, MARITAL STATUS AND EDUCATIONAL LEVELS-1961.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 129 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 124 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group—6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in cols. 2 as 440 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in brackets under Col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 275 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 203 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 580 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1014 persons have been classed as Non-Agricultural Labour Foree due to mistake at the stage of Hand Sorting.

TABLE 4—NON-AGRICULTURAL LABOUR FORCE (10 YEARS AND OVER) BY OCCUPATION (MAIN AND SUB-GROUPS), EMPLOYMENT STATUS, AGE, MARITAL STATUS AND EDUCATIONAL LEVELS-1961.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 194 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,702 persons have been clased as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col 3 to 6 may not tally with the figures shown in col 2 as 9,067 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receibers" and hence 'economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,805 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 4,182 persons "not working but looking for work" did not have or reported their Employment Status.
**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 2,031 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But thes figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, bu 101 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 251 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,829 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 481 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 3,585 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 741 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 3,903 persons "not working but looking for work" did not have or reported their Employment Status.
**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1.761 persons have been classed as Non-Agricultural due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,058 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 479 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 665 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 165 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 818 persons have been classed as Non-Agricultural due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 789 persons have been clased as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 94 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,176 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 993 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 9,671 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 5,016 persons have been classedas Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus & Tram Conductor, Postman and sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col 3 to 6 may not tally with the figures shown in col. 2 as 1,366 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col 24.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 484 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 3,681 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 241 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and sorter who should habe been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 228 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 205 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 319 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col 3 to 6 may not tally with the figures shown in col. 2 as 754 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 519 persons have been classed as Non-Agricultural Labcur Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col 3 to 6 may not tally with the figures shown in col 2 as 178 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col 24.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 57 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

* Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 485 persons "not working but looking for work" did not have or reported their Employment Status.

** Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 514 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 588 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 419 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,677 persons have been classed as Non-Agricultural due Labour Force to mistake at the stage of Hand Sorting.

[1] Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 1,709 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 363 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 560 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence 'reconomically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 497 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But thes figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, bu 1,139 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 510 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 234 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 472 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 492 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 118 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

[1] Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 37 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 163 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

[1] Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 16 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whomseparate figures have been shown in bracket under col. 24.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force' but persons have been classed as Non-Agricultural due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 13 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 88 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 171 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 306 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 136 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 552 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 30 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 47 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 512 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 382 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 145 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 17 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as ''Rent Receivers'' and hence ''economically inactive''. But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 33,624 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 157 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collector and Inspector (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 2398 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also separate of whom figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably or operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 630 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising clltivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,279 persons have been classd as Non-Agricural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 122 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 116 persons have been classed as Non-Agricultural due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupaton have been classed as 'Rent Receivers' and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 239 persons have been classed as Non-Agricultural LabourForce due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but **191** persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 326 persons have been classed as Non-Agricultural Labour Forc due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 679 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 187 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,337 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupaton have been clased as "Rent Receivers" and hence 'economically inactive". But these figures are probaby for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,661 persons have been classed as Non-Agricultural Labour Forcce due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,712 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 82 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers', and hence 'economically inactive". But these, figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force but 205 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probobly for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,608 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been cassed as "Rent Receivers" and hence ,'economically inactive". But these figures are probably for operaitng or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 477 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sortng.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists forms part of the Agricultural Labour Force, but 697 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,740 persons have been classed as Non-Agricultural due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation haevbeen classed as ,'Rent Receivers' and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,503 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence 'economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 462 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 159 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cutivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 803 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 734 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 94 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 775 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 899 persons have been classed as Non-Agricultural due Labour Force to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 4,585 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 444 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 3,511 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1 Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Posman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col 3 to 6 may not tally with the figures shown in col 2 as 152 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col 24.

*Non-working Land owners who have no other occupation have been classed as 'Rent Receivers'' and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 239 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 346 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force. but 183 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 36 may not tally with the figures shown in col. 2 as 386 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 258 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorting who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 754 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 510 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 178 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 56 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers' and hence 'economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force but 480 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 863 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures which have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 555 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 395 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1630 persons have been classed as

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 1,698 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 356 person have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 560 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 492 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

[1] Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 630 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 27.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,011 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 3 to 6 may not tally with the figures shown in col. 2 as 365 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 480 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 458 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorter who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col 3 to 6 may not tally with the figures shown in col 2 as 288 persons "not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 491 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 117 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 163 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 57 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 62 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 88 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 301 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 38 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agricuturists form part of the Agricultural Labour Force, but 47 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating of supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 507 persons have been classed as Non-Agricultural Labour Force due to mistake at the Stage of Hand Sorting.

1. Including Telegraph Operators, Telephone Operators, Ticket Collectors and Inspectors (Railway and inland navigation), Bus and Tram Conductor, Postman and Sorting who should have been grouped under Main group 6 Transport and Communication.

*Figures against the Non-Agricultural Labour Force of col. 6 to 3 may not tally with the figures shown in col. 2 as 28,474 persons "Not working but looking for work" did not have or reported their Employment Status.

**Degree holders include oriental degree holders also of whom separate figures have been shown in bracket under col. 24.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 381 persons have been classed as Non-Agricultural due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 149 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 36,640 persons have been classed as Non-Agriculture Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 154 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non--working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 619 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of hand sorting.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,252 persons have been classed as Non-Agriculture Labour Force due to mistake at the stage of hand sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators, These three classes of Agriculturists form part of the Agricultural Labour Force, but 122 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

* Non-working Land owners who have no other occupation have been classed as 'Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators, These three classes of Agriculturists form part of the Agricultural Labour Force, but 316 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 660 persons have been classed as Non-Agricultural Labour Force, due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators, These three classes of Agriculturists form part of the Agricultural Labour Force, but 187 persons have been classed as Non-Agriculture Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agricuturists form part of the Agricultural Labour Force, but 1,703 persons have been classed as Non-Agricultural Labour force due to mistake at the stage of Hand Sorting.

(*) Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economical inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 82 persons have been classed as Non-Agricultural Labour Force due to mistake as the stage of Hand Sorting.

---

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 201 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,598 persons have been classed as Non-Agricultural Labour Force due to mistake as the stage of Hand Sorting.

53	Liquors and Beverages	22	—	2	7	13	53

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 694 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,058 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 458 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 518 persons have been classed as Non-Agricultural Labour Force due to mistake as the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 793 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 731 persons have been classed as Non-Agricultural Labour Force due to mistake as the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators, These three classes of Agriculturists form part of the Agricultural Labour Force, but 867 persons have been classed as Non-Agricultural Labour Foree due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 4,511 persons have been classed as Non-Agricultural Labour Force due to mistake as the stage of Hand Sorting.

(*) Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators, These three classes of Agriculturists form part of the Agricultural Labour Force, but 441 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

* Non-working land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 3,468 persons have been classed as Non-Agricultural Labour Force due to mistake as the stage of Hand Sorting.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 182 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agricultural form part of the Agricultural Labour Force, but 256 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 496 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 545 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 389 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 1,610 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists from part of the Agricultural Labour Force, but 354 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 472 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 448 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

(*) Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 138 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 57 persons have been classed as Non-Agriculture Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 289 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

*Non-working Land owners who have no other occupation have been classed as ' 'Rent Receivers'' and hence 'economically inactive''. But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 530 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

---

* Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 379 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.

(*) Non-working Land owners who have no other occupation have been classed as "Rent Receivers" and hence "economically inactive". But these figures are probably for operating or supervising cultivators. These three classes of Agriculturists form part of the Agricultural Labour Force, but 17 persons have been classed as Non-Agricultural Labour Force due to mistake at the stage of Hand Sorting.
